

Approach

NUCRAFT

Approach tables are multifunctional, modular and adaptive tables for environments designed as multi-purpose meeting spaces that accommodate migration from training space, to event place, to formal meeting room. In such dynamic spaces where a refined aesthetic is critical, Approach tables reconfigure quickly to serve many purposes. Approach tables are familiar and elegant, simultaneously delivering high performance.

Wire Management

- Modular power system included with each table
- Includes: one duplex receptacle hidden in base, one female and one male jumper
- Jumpers feature quick-release ends to make connection between tables fast and secure
- Optional power in-feeds include hardwire and corded versions
- Magnets on underside of table easily manage power jumpers

Nested configuration

Every Approach table comes with a broad array of standard features, including:

- Table top flips to nest and minimize storage requirements
- Finished bottom
- Release lever
- Ganging connectors
- Power management magnets
- Leveling glides
- Modular power
- Power options (Power Matrix and Tech Node)
- Built-in wire management
